DETAILED ACTION

Continued Examination Under 37 CFR 1.114

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after allowance or after an Office action under *Ex Parte Quayle*, 25 USPQ 74, 453 O.G. 213 (Comm'r Pat. 1935). Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, prosecution in this application has been reopened pursuant to 37 CFR 1.114. Applicant's submission filed on March 12, 2004 has been entered. Claims 27, 33 and 36-43 are pending, claim 27 currently amended and claims 39-43 newly added.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 39-43 are rejected under 35 U.S.C. 102(b) as being anticipated by applicant's admitted prior art. Applicant's admitted prior art, as shown in instant figures 1-3 and discussed in the instant specification pages 2-4, teach the gate stack and materials of claims 39-43.

Specifically, the prior art teaches a polysilicon layer 18 over a substrate 12;

a metal comprising layer, for example titanium silicide, 20 over the polysilicon layer;

an antireflective layer 26 on the metal comprising layer 20, the antireflective layer comprising carbon, nitrogen, silicon, oxygen and hydrogen in the claimed compositions (see page 3, lines 12-20 for the claimed compositions); and

a silicon nitride layer 24 on the antireflective layer.

Allowable Subject Matter

3. Claims 27, 33 and 36-38 are allowed.
